

**Number of Chronic Hospital Beds and Patient Days
and Percent Occupancy, by Facility: Maryland, 2008**

Jurisdiction/Facility	Number of Beds	Number of Days	Occupancy (%)
Baltimore City			
<i>James Lawrence Kernan Hospital</i> ¹	40	15,640	106.83%
<i>Johns Hopkins Bayview Medical Center</i> ²	76	26,189	98.72%
<i>Levindale Hebrew Geriatric Center and Hospital</i>	100	38,597	105.46%
<i>University Specialty Hospital</i>	180	49,463	75.08%
Prince George's County			
<i>Gladys Spellman Specialty Hospital and Nursing Center</i>	52	15,934	83.72%
SUBTOTAL: Private Chronic Hospitals	448	145,823	89.64%
Washington County			
<i>Western Maryland Hospital Center</i> ³	60	8,459	38.52%
Wicomico County			
<i>Deer's Head Hospital Center</i> ⁴	66	5,083	21.04%
SUBTOTAL: State-operated Chronic Hospitals ⁵	126	13,542	29.37%
STATEWIDE TOTAL ⁶	574	159,365	76.33%

Sources: Maryland Health Care Commission. The number of licensed chronic hospital beds maintained in the Commission's inventory is based on the Commission's Certificate of Need files and licensing information provided by the Office of Health Care Quality. The number of FY 2008 patient days for the private chronic hospitals is obtained from the Financial Data Base, as reported by private chronic hospitals to the Health Services Cost Review Commission (HSCRC), as of October 27, 2009. The number of FY 2008 patient days for the two state-operated chronic hospitals is obtained from the Hospital Management Information System (HMIS), as maintained by the Maryland Department of Health and Mental Hygiene.

Notes: The number of beds reflects the number of licensed chronic hospital beds at each facility as of June 30, 2008 (the end of the 2008 fiscal year reporting period). Occupancy is calculated based on licensed beds. For the two facilities with over 100 percent chronic hospital occupancy, patient days reflect that chronic hospital patients may be placed in other types of licensed beds within their facilities.

¹ Kernan Hospital's 40 chronic hospital beds include 16 dually licensed chronic/rehabilitation beds.

² Johns Hopkins Bayview Medical Center's 26,189 patient days is the combined number of patient days for the separately licensed 76 chronic hospital beds and nine comprehensive inpatient rehabilitation (CIR) beds. Bayview obtained Commission approval to add waiver beds and increase rehabilitation (CIR) beds from six to nine beds, and chronic hospital beds from 69 to 76 beds, effective January 1, 2008. Chronic hospital occupancy is calculated based on the 76 licensed chronic hospital bed days available for FY 2008.

³ Western Maryland Hospital Center's occupancy, based on its 30 *budgeted* chronic hospital beds, would be 77.04 percent.

⁴ Deer's Head Center's chronic hospital occupancy, based on its 18 *budgeted* chronic hospital beds, would be 77.16 percent.

⁵ The occupancy for the two State-operated chronic hospitals, based on the total 48 *budgeted* chronic hospital beds, would be 77.08 percent.

⁶ The statewide chronic hospital occupancy based on the 448 *licensed* beds at the five *private* facilities plus the 48 *budgeted* beds at the two *state-operated* facilities would be 88.41 percent.
